

To Setup and Connect Laptops Wirelessly in the Classroom

- Step 1:** Take out the Wireless Router and connect the network cable into the data point on the wall and plug the power into a nearby socket. Three green lights will come on at the front of the router.

- Step 2:** Once the green lights are on, wait 5 minutes before turning on laptops, as the router needs to pick up the wireless network. **Log onto the laptop.**

- Step 3:** When shown the screen below click on the plus (+) icon beside main site. If this screen does not appear restart laptop, as it has not picked up the network.

- Step 4:** As Shown in image below, click the plus (+) icon beside Post Primary and click the plus (+) icon beside Subject Areas. Click on your subject (i.e. English) and select OK.
